### Company Description

NdotLight is developing offers a web-based 3D design platform.

We provide 'Revolve', a web-based lightweight yet realistic rendering 3D viewer, and 'NdotCAD for Web', a 3D design software that makes 3D design easy for everyone.

### Product

#### Revolve

**Function and Usage :** Revolve is a web-based collaborative 3D design platform. By simply sharing a link, anyone can easily access the latest version of a 3D file and edit it together with real-time comments. With Revolve, the 3D design process can be performed on all types of browsers and devices, ensuring the highest production speed.

#### Marketing and Selling Points :

1. The Revolve 3D viewer offers the world's first photo-realistic quality renderer. The power of a 3D viewer is even greater when it's paired with e-commerce. When e-commerce stores present products in 3D, they see a 40% increase in conversions, a 61% increase in sales, and a 40% decrease in returns. By embedding the Revolve Viewer into your online channels, you can effectively showcase your products.
2. Improve your 3D design workflow faster with real-time communication. View and share the latest versions of 3D files via web browser links without installing software.
