Company Description

Norma is a trailblazer in quantum technologies. Norma is committed to integrating Post-Quantum Cryptography (PQC) technology, ensuring cutting-edge protection in IoT, automotive security, and smart home security. In its ongoing pursuit of excellence, Norma has recently delved into groundbreaking developments in quantum computing and platforms.

Product

Q Platform

Function and Usage :

Q Platform offers a streamlined approach to quantum computer deployment and development. It simplifies the setup of quantum systems, provides a robust framework for technology advancement, supports Quantum AI algorithms, and delivers customized training for optimal use of quantum computers.

Marketing and Selling Points :

Q Platform prepares businesses for the future, positioning them at the forefront of the quantum computing era. Q Platform redefines quantum computing by:

1. Providing a turnkey solution for easy quantum computer deployment.
2. Serving as a catalyst for innovation with a user-friendly, high-performance environment.
3. Offering comprehensive support, from system building to Quantum AI algorithm development and extensive training.

Q Care Connect

Function and Usage :

Q Care Connect is an advanced PQC SSL VPN solution that guarantees secure and efficient connectivity. It provides encrypted data transmission, robust user authentication, and strict network access control, enhancing operational flexibility and network security while offering a user-friendly interface for seamless integration.

Marketing and Selling Points :

Q Care Connect ensures superior security and connectivity, keeping businesses ahead in the digital age. Q Care Connect is the benchmark for PQC SSL VPN solutions, featuring:

1. Quantum-level data protection.
2. A scalable, user-friendly interface.
3. Cost-effective, robust security.
4. 24/7 support for uninterrupted operations.
5. Easy transition and customization to meet unique business requirements.
