Company Description

The company aspires to enhance the well-being of individuals throughout their senior years. Recognizing that everyone will eventually enter this phase of life, we are dedicated to developing health solutions that empower individuals to enjoy a vibrant and healthy daily life during their senior years.

Product

re:moving motion analyzer

Function and Usage : This device utilizes seniors' body data to assess Activities of Daily Living (ADL) levels, predict diseases, and formulate exercise prescriptions. The results will be shared on your mobile phone. You can access the exercise instructions anytime and anywhere.

Marketing and Selling Points :

1. ADL Analysis
 - Serving as an assessment of daily living abilities, this analysis can be applied in diverse settings, including evaluating senior job fit and establishing welfare standards.
2. Disease Prediction
 - Predicting diseases through the analysis of weak muscle and joint movements can be instrumental in preventive healthcare efforts.
3. Exercise Prescription
 - Providing exercise prescriptions can contribute to health improvement and disease prevention, offering tailored guidance for individual well-being
