**Company Description**

DEEP.FINE offer XR metaverse services based on reality. Since our startup launch in 2019, we've provided XR services with smart glasses to local governments and businesses, showcasing our unique tech. Now, we're developing easy-to-implement XR environments, accessible not just with smart glasses but also on tablets or smartphones

**Product**

**DEEP.FINE Spatial Crafter**

**Function and Usage :** DSC(DeepFine Spatial Crafter), our platform for effortlessly digitizing real-world spaces. Users can create virtual maps by scanning real-space images using mobile devices and seamlessly position XR content within the maps at desired locations.

**Marketing and Selling Points :** DSC(DEEP.FINE SPATIAL CRAFTER) overcome GPS limitation .Unlike GPS, which only functions outdoors where satellite signals are available, our image-based system is operable in both indoor and outdoor environments. Another strength point is simplest XR content creation tool. With just a smartphone, you can create anything from real-world spaces and objects to even more.
