Company Description

UBCS delivers the best end-to-end solutions for mobile network infrastructure.

Based on our experience in Korea, we work with our customers to design, manufacture, and create lasting connections with optimal products.

Product

Power and Optical Fiber Connectivity

Function and Usage : UBCS's portfolio includes power and optic products that connect radio units and rectifiers and serve the outdoor 5G networks.

To provide an optimal user experience, they are designed and customized to serve customer needs

RF Connectivity

Function and Usage : UBCS provides a portfolio of high-performance and reliable "RF connectivity" as well as smart cabling solutions in various wireless infrastructure environments such as base stations, in-buildings, subways, and tunnels where mobile coverage is operated.
