Company Description

Crowdworks is the leading AI data & LLM provider and specializes in securing quality fine-tuning or RLHF data. With customers like Samsung, Uber, Hyundai Motors and NYU, we provide end-to-end solutions for the entire AI lifecycle including defining requirements to generating AI data, developing algorithms, and validating models.

Product

LLM based service bot

Function and Usage : From service integration to model fine-tuning and prompt-engineering, our LLM platform empowers our customers with the ability to build their Generative AI models. From retail to healthcare and autonomous vehicles, our services and solutions are versatile and can be applied to a variety of industries and verticals. Our products include:

- Data annotation services
- Prompt engineering & Fine tuning of LLM

Marketing and Selling Points :

- With a highly trained workforce of over 570,000 labelers, our data annotation service is unparalleled in the industry in terms of accuracy and quality.
- Our ML-powered data labeling platform gives users comprehensive oversight over all facets of their labeling projects.
- Crowdworks LLM Platform enables our customers to build a customized Generative AI model that aligns with their business objectives and corporate branding. Leveraging human feedback data and prompt engineering, the Crowdworks LLM Platform filters erroneous and harmful responses.
- Crowdworks LLM Apps are ready-to-use AI solutions for enterprises. We provide consultation, prompt engineering, data preparation as well as application development services.
